## ABOUT ME

Results-driven Full-Stack Web Developer with over 5 years of experience architecting, developing, and deploying enterprise-grade web applications. Specializing in PHP, MySQL, and Multi-Tenant SaaS architectures, with a strong track record of single-handedly building complex Industrial ERPs, Educational Management Systems, and Financial Payroll Engines. Adept at transforming complex business requirements into secure, automated, and highly scalable digital solutions.

## EDUCATION AND TRAINING

**01/04/2016 – 01/08/2021** Bannu, Pakistan

**Bachelor of Science (B.Sc.) in Computer Science** University of Science & Technology Bannu

Computer Science, Software Engineering, Object-Oriented Programming, Database Management, and Web Development. Graduated with 1st Division.

**Level in EQF** EQF level 6

**01/01/2014 – 04/01/2016** Bannu, Pakistan

**Intermediate in Computer Science (ICS)** BISE Bannu

Computer Science, Mathematics, and Physics. Graduated with Grade B (692/1100).

**Level in EQF** EQF level 4

**01/01/2013** Bannu, Pakistan

**Matriculation** BISE Bannu

Graduated with 1st Division (667/1050).

## WORK EXPERIENCE

**Self-Employed / Independent Software Housing** Bannu, Pakistan

**Lead Full-Stack Developer & Founder**

**01/01/2017 – Current**

- Spearheaded the end-to-end development of over 50 enterprise-grade web applications, modules, and multi-tenant SaaS platforms for industrial, educational, and commercial clients.
- Industrial ERP & Manufacturing Suite: Architected a multi-tenant factory ERP managing multiple plants. Engineered a dynamic Bill of Materials (BOM) engine with costing logic, real-time machine downtime tracking, Quality Control (QC) inspection suites, and automated warehouse/inventory management.
- Educational ERP Systems: Developed comprehensive school management systems featuring bilingual localization (Urdu/English), dynamic fee structure builders, AJAX-driven gradebooks, and a custom geo-fenced attendance security system calculating GPS radius.
- Financial & Payroll Engines: Built highly secure JSON-based payroll engines for dynamic allowance/deduction calculations, integrated partial payment ledger trackers, and multi-tenant subscription managers for SaaS clients.
- Security & System Utilities: Implemented custom middleware for CSRF token validation, automated SQL database backup/restore utilities, and comprehensive forensic audit logging services.

**NADRA (National Database & Registration Authority)** Bannu, Pakistan

**Junior Executive (Data Entry Executive) / Focal Person NSER**

**24/01/2022 – 01/01/2026**

- Serve as the Focal Person for the NSER project, handling highly sensitive citizen data with extreme accuracy and compliance.

- Ensure 100% data integrity and security while managing high-volume data entry and administrative operations.

**Khalifa Gul Nawaz Medical Teaching Institution (MTI)** Bannu, Pakistan

**Web Developer & IT Operator**

01/07/2015 – 01/06/2017

- Developed, maintained, and optimized the hospital's official web presence and internal management portals.
- Streamlined daily digital operations, reducing administrative bottlenecks through automated data entry and record-keeping systems.

**Mikesoft Software House** Bannu, Pakistan

**Dynamic Web Developer**

01/03/2015 – 01/03/2016

- Developed custom PHP/MySQL web projects tailored to client specifications.
- Designed aesthetic, responsive front-end interfaces and integrated dynamic backend functionalities.

PROJECTS

**ShopAccountingSaaS – Multi-Tenant ERP Platform**

Architected and deployed a multi-tenant Software-as-a-Service (SaaS) Enterprise Resource Planning (ERP) system tailored for high-scale commercial distribution. Engineered a highly optimized single-file PHP backend integrated with a robust MySQL schema to execute complex financial data processing, ensure strict tenant data isolation,

and manage full-lifecycle B2B accounting operations. Designed the frontend with a mobile-first, minimalist approach using fluid typography to ensure cross-device operational efficiency.

### ● **HMS Pro – Cloud-Ready Hospital Management SaaS**

Developed a comprehensive, cloud-ready Hospital Management System built on a secure multi-tenant architecture. The platform streamlines and unifies clinical, administrative, financial, and operational workflows for multiple healthcare facilities into a single interface. Engineered for scalability and high availability, the system processes large volumes of sensitive healthcare data while maintaining strict performance and security standards without relying on bloated dependencies.

### ● **BNI Enterprises BDMS (Inventory)**

Engineered an enterprise-grade Business Database Management System (BDMS) specifically designed to handle high-volume stock processing for large-scale dealerships. Developed sophisticated backend logic to automate complex multi-tier tax calculations, multi-party financial accounting, and real-time inventory tracking. The system delivers a highly responsive, zero-latency experience tailored for heavy daily transaction loads.

### ● **ConvertPHPAppToExe and APK Engine**

Created a complete automation environment and workflow engine that transforms server-side PHP/MySQL web applications into standalone, portable Windows executable files (.exe). Integrated the PHP Desktop Chrome rendering engine with a portable MariaDB server, bridging web technologies with native desktop environments. This solution enables offline-first, portable deployments of complex web platforms without requiring end-user server configuration.
